

RLC - 1 Light Controller

RLC - 1 Light Controller is a simple user-friendly menu-driven table formats controller.

RLC - 1 controls the light intensity according to time and birds' age. It simulates sunrise and sunset cycles as determined by the user.

RLC - 1 allows the user to change the light intensity for every growth day as many times as needed.

The RLC - 1 shows the light intensity of the present growth day by percentage and the actual time.

In case of power failure, or if the RLC - 1 is accidentally unplugged the RLC - 1 is equipped with a battery so the program will not be erased.

Functions

Input: single phase 230 V - 0,2 Amp.

Output: 0 - 10 V DC control signal

Temperature range: -10 - +50° C

Water and dust tight (IP55)

Agent:

Munters
